INTRODUCTION

The Department of Physiology, Silchar Medical College & Hospital has been functioning as a platform to build the basic pillars of undergraduate medical education since the establishment of the institute in the year 1968. All throughout the decades the department has been enriched with dedicated enthusiastic and dynamic faculty members. Total number of 125 undergraduate MBBS students and 2 post graduate trainees take admission into the department every year. Over the years the department has been taking steps to nourish the extra-curricular talents parallelly with the academic brilliance of the students and organizing various events time to time and encouraging the students. The department has pioneered in celebrating "WORLD PHYSIOLOGY WEEK" among all the current Medical Colleges of Assam in the year 2023. This year the Department is going to celebrate the same w.e.f 18th to 23rd November with a week long Schedule involving the UG students of all the Medical Colleges of Assam as well as the Post graduate trainees of SMCH.

We are delighted to celebrate World Physiology Week at Silchar Medical College.

This special week offers an excellent opportunity to explore the wonders of physiology and its crucial role in medical science. Through engaging sessions, interactive workshops, and insightful discussions, we aim to deepen our understanding of the intricate mechanisms that keep the human body in balance. Let this week inspire us all to appreciate the foundations of health and the ongoing advancements in the field of medicine. Physiology has reached new heights with advancements in both clinical and research fields. There are still many unexplored domains, and physiology holds the key to unlocking these mysteries, offering immense opportunities for discovery and innovation.

Physiology can help us to explore the unexplored.

“The beauty of science lies not just in the answers it provides, but in the questions it inspires”

It fills me with immense joy and excitement to invite you all to join us in celebrating World Physiology Week at Silchar Medical College! This week is a true celebration of the incredible journey that physiology takes us on—exploring the intricate systems of the human body, unraveling mysteries, and constantly pushing the boundaries of knowledge. From the heartbeat that gives us life to the neurons that power our thoughts, physiology reminds us of the marvels within. I encourage each one of you to participate in the Quizzes, debates, lectures, and activities planned for this week. Let us take this opportunity to not only learn but to embrace the wonder of how our bodies work, and celebrate the progress we've made in understanding life itself. Together, let's make this World Physiology Week a vibrant and enriching experience for everyone!

"The more we understand the workings of the body, the more we realize there is so much more to explore. The human body is a masterpiece of complexity, waiting to be discovered."
